Advantage Series

Full Face & Half Masks

MSA's expertise in breathing protection is very evident in its range of full face masks and half masks. Comfort and quality, useful accessories and an unbelievable range of filters meet every challenge.

The Advantage Series can be used with filters and powered air-purifying devices and features a full range of products that meet the toughest users expectations in terms of reliability, safety and comfort. The full face and half masks have been designed based on strong Voice of Customers analysis and have reached the highest level in terms of ease of use and ease of maintenance.

The full face mask series Advantage 3000 provides both protection and unparalleled comfort. The soft sealing line made of hypo allergenic silicone provides a pressure-free fit. The large, optically corrected lens ensures a clear, undistorted view, while the grey-blue colour gives the mask an aesthetic appearance.

In order to meet all requirements concerning respiratory protective equipment, the Advantage 3000 comes in two versions, each in three different sizes. Choose between Advantage 3200 with bayonet connection and Advantage 3100 with EN 148 standard thread filter connection.

Donning the Advantage 3000 is unbelievably quick, simple and accomplished without painful hair pulling. The patented Advantage head harness gives a perfect face piece-to-face fit.

Donning

Put your chin into the chin cup

Pull the harness over your head

Tighten the two lower straps

	Features	Benefits
Excellent wearer comfort	Innovative Advantage harness	Simplified donning and doffing; no painful friction with hair
	Soft and large sealing line made of hypo allergenic silicone	Pressure-free and safe fit
Optimal protection	Available in 3 sizes	Perfect adaptation to different face shapes
	Panoramic view lens	Undisturbed field of view
Cost effectiveness	Quick (dis)assembly	Easy cleaning
	One design – two versions (twin and single connection)	Reduced test and training costs
	Bayonet filters also suitable for Advantage 420 and 200 LS	Rationalisation of stocks

With its patented MultiFlex system the Advantage 200 LS offers maximum protection and high wearing comfort. The soft, pliable combination of rubber and plastic provides a customised and pressure-free fit, instantly conforming to the wearer's unique facial characteristics.

The Advantage 200 LS comes in three sizes and has a complete and exclusive filter programme to protect against harmful particles and/or gases.

Facepiece-to face Anthrocurve

Advantage 200 LS half mask

	Features	Benefits
Excellent wearer comfort	Well-balanced, low weight design	Pressure-free fit
Optimal protection	MultiFlex (soft sealing line with robust mask body)	Excellent face-piece-to-face fit
	Anthrocurve pre-formed nosepiece and adjustable head harness	Perfect adaptation to different face shapes
Cost effectiveness	Low maintenance design	• Easy to clean
	Wide range of filters	Serves various applications
	Bayonet filters also suitable for Advantage 3200 and 420	Rationalisation of stocks

The innovative Advantage 400 half mask stands out due to exceptional comfort and sophisticated design.

The patented single loop head harness is unique to the market. It grants the user an intuitional operation and offers high comfort and flexibility. The drop-down option allows the user to remove the mask from the face without removing his other safety equipment (like helmet, ear muffs or spectacles). The respirator can be worn along the chest until the next use. Lock-down permits to set the harness to the proper fit. It can be then reused without any further adjustments.

The one-piece MultiFlex nose cup is made of soft and smooth co-molded silicone and rigid plastic. This unique combination gives the face piece great durability and extraordinary stability when worn, without compromising comfort.

The Advantage 400 is either available with single thread EN 148-1 connection (Advantage 410) or with twin bayonet MSA connection (Advantage 420). For both versions MSA offers a wide range of different filters, suitable for all applications.

Donning

Place cradle on head

Pull down front straps and lock lever

Close neck buckles and pull on both straps evenly

	Features	Benefits
Simplicity	Unique harness assembly	Makes for easier donning and doffing
	Drop-down mode	Allows the user to remove respirator and carry it safely along the chest while wearing head protection
	• Lock-down mode	Provides the user with the option of fixed sizing (mask can be reused without further adjustments)
	Innovative lever	Enables a quick and easy switch between lock-down and drop-down mode
	Flat single loop harness	Eliminates pressure points on head when head protection is used
Comfort	Multi-ethnic face seal	Adapts to a broad range of faces globally
Comfort	Wide straps	Minimises twisting and cutting in the nape
	Chin cup with built-in drain hole	Reduces slippage of face piece in hot humid conditions
	One-piece nose cup made of soft over-molded silicone and rigid plastic	Offers excellent stability on the user's face and eliminates multiple leak points
Calaba	Textured inner seal of face piece	Maintains good face piece fit
Safety	No loose or dangling straps	Provides greater visibility
	Downwards pointing exhalation valve	• Avoids projection of exhaled humid air and reduces fogging on face shield lens
Flexibility	Low profile design	• Integrates extremely well with other PPE
	Adjustable cradle and 3 face piece sizes	• Provides perfect adaptation to different head sizes and facial contours
	Drop-down and non-drop-down option	Allows customization of the mask
	Single (410) and twin (420) filter variant	Offers the possibility of choosing a model according to individual preferences
Cost effectiveness	Only 3 major components	Makes cleaning and maintenance much easier
	High quality silicone	Offers great durability
	Uses existing MSA filters	Minimises inventory
	Two versions – one design (twin and single connection)	Reduces test and training costs

Suitable for:

High heat environments

- Steel mills
- Foundries
- Hot-houses
- Coke ovens
- Bagging operations

Welding

- Hex chrome
- Carbon steel
- Brazing
- Soldering
- Metal pouring

Petrochemical exposure

- Chemical manufacturing
- Dipping / coating operations
- Sampling

Extreme cold conditions

- Drilling rigs
- Construction
- Rail road repair
- Northern climates

Painting

- Bridge repair
- Construction painting
- Coatings
- Chemical overlays

Advantage Filters

The Advantage filter line is a complete line of particulate, chemical and combination cartridges, providing the best in light-weight and high-performance filters.

Crafted for easy installation and strong protection, Advantage respirator cartridges use a bayonetstyle design for easy mounting. With low-lug height and lead-in connectors, the cartridges lock into place with only a single twist.

The Advantage filter lines are for use with Advantage 3200, Advantage 200 LS and Advantage 420.

Advantage 3200 with Advantage chemical cartridges

Standard Thread Filters

The greatest experience and know-how, as well as one of the widest ranges in the market make MSA filters the first choice for users in all industries.

The high-performance particle filter P3 PlexTec and all combination filters are using MSA's PlexTec filter media. The significantly increased filtering surface reduces breathing resistance and results in slightly more relaxed breathing as well as more compact filter housings.

The MSA 9X Series of Gas and Combination filters is in full compliance with the REACH regulation and does not include any toxic materials listed in the European Regulation.

The Standard Thread Filters can be used with Advantage 3100 and Advantage 410.

For detailed information on standard thread filters please see leaflet 05-100.2.

MSA – The Safety Company

Our business is safety. We've been the world's leading manufacturer of high-quality safety products since 1914. MSA products may be simple to use and maintain, but they're also highly-sophisticated devices and protective gear — the result of countless R&D hours, relentless testing and an unwavering commitment to quality that saves lives and protects thousands of men and women each and every day. Many of our most popular products integrate multiple combinations of electronics, mechanical systems and advanced materials to help ensure that users around the world remain protected in even the most hazardous of situations.

Our Mission

MSA's mission is to see to it that men and women may work in safety and that they, their families and their communities may live in health throughout the world.

MSA: We Know What's at Stake.

Note: This Bulletin contains only a general description of the products shown. While product uses and performance capabilities are generally described, the products shall not, under any circumstances, be used by untrained or unqualified individuals. The products shall not be used until the product instructions/user manual, which contains detailed information concerning the proper use and care of the products, including any warnings or cautions, have been thoroughly read and understood. Specifications are subject to change without prior notice.

MSA operates in over 40 countries worldwide. To find an MSA office near you, please visit **MSAsafety.com/offices**.
