

These black chemical resistant gloves offer one glove with the benefits of two. Multi-barrier chemical protection

- These acid-resistant gloves offer a nitrile and neoprene barrier that provides advanced chemical protection from acids to hydrocarbons and beyond
- These AlphaTec® 53-001 black chemical resistant gloves have 'Type A' chemical protection under EN ISO 374:2016
- MICROCHEM™ Chemical Barrier Technology combines polymers in proprietary blends or multi-layer structures specific to their application, providing superior protection to wearers
- ANSELL GRIP™ Technology for the handling of wet or oily parts providing enhanced dexterity, grip and comfort

Industries

- Automotive
- Oil and gas
- Chemical
- Infrastructure Maintenance
- Construction

Applications

- Chemical Handling
- Charging and blending raw materials
- Equipment maintenance and repair
- Opening and draining pumps valves or lines

Key Features

- Innovative multi-layer polymer design - nitrile/neoprene/nitrile layers
- Provides chemical protection against a wide range of chemicals from acids and bases to hydrocarbons and organic solvent
- Tested according to EN ISO 374:2016, permeation time >30 minutes against 13 chemicals out of 18 listed
- Features the latest MICROCHEM™ chemical barrier technology providing superior protection for use in hazardous environments
- ANSELL GRIP™ Technology for the handling of wet or oily parts providing enhanced dexterity, grip and comfort
- Inner soft nylon liner for comfort and increased mechanical protection
- Oeko-Tex® Standard 100 Approved
- For complete chemical permeation information, please visit: www.ansellguardianpartner.com
