

# GETTING STARTED | THE ALTAIR io ECOSYSTEM

## STEP 1

### GRID WEB APP

1. Log in to the MSA Grid web app.
2. Don't have an account? Contact MSA.

## STEP 2

### GRID MOBILE APP

1. Download the Grid mobile app from Google Play or Apple App Store.
2. Log into your MSA Grid account.

## STEP 3

### ALTAIR io 4

1. Using the Grid web app, set up your customer ALTAIR io 4 cloud-configuration profile under the Assets > Configuration tab. The factory default is used otherwise.
2. Devices typically arrive pre-commissioned to your account under your default configuration. At initial power on, each device will show up as connected and apply your default configuration.
3. Don't see a device commissioned? Use the Grid mobile app's guided ALTAIR io 4 setup.

## STEP 4

### ALTAIR io DOCK

1. Assemble your bank and plug it into power.
2. Use the Grid mobile app's guided DOCK setup.  
*Note: Make sure you're connected to the bank's primary test stand, located farthest to the right.*
3. Configure your bank's settings – including giving it a unique identifier used in your Grid account.

## STEP 5

### ALTAIR io CHARGE

1. Run power to the ALTAIR io Charge.
2. Use the Grid mobile app's guided Charge setup.
3. Make sure to give it a unique identifier which will be used in your Grid account.

## STEP 6

### MSA ID TAG

1. In the Grid web app, set up your workforce roster on the labels tab.
2. In your Grid mobile app, use the guided Tag setup to assign it to a worker or as a return Tag.  
*Note: The Grid mobile app will populate your current workforce roster.*
